COMMAND  
ACTIVE INDICATOR

## NORMAL SEQUENCE

To select a Site, Press any listed Site. As noted on the left, the Site Button selected will outline. Next select a command (only 1 can be selected at a time). After at least 1 site and 1 command have been selected, the START Button may be pressed and the request is transmitted. As this occurs the active indicator will appear with the site and command button which were selected. As the cycle ends all buttons will return to their normal state.
